

NanoPolish Remover

Product description

NanoPolish Remover is an effective cleaning agent particularly for removal of polish and wax. *NanoPolish Remover* dissolves common grime, grease and oils. It effectively removes marks left by rubber soles. For indoor use only.

Preparation

Remove all loose particles which might scratch the surface.

Application

NanoPolish Remover is applied in an even layer using a cloth or mop. When removing polish, allow *NanoPolish Remover* several minutes to take effect, then scrub and finally rinse carefully with water. It is very important to rinse thoroughly, as remaining *NanoPolish Remover* may have an adverse effect on the resultant finish. When cleaning mechanically, a fibre brush or a red polishing pad should be used. Take care when cleaning oak parquet floors, as discolouring may arise. Always follow the dilution instructions. Never soak wood floors, and remove water immediately.

Cleaning

Rinse cloths and other tools with water.

Health and Safety

NanoPolish Remover is not classified as being environmentally hazardous. Irritating to eyes and skin. Keep out of the reach of children. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of water. Wear suitable gloves and eye/face protection. If swallowed, seek medical advice immediately and show this container or label. For further information see Safety Data Sheet.
